### 1. Цели и задачи изучения дисциплины (модуля).

### 1.1 Цель освоения дисциплины.

Основной целью курса является овладение студентами коммуникативной компетенцией, которая позволит пользоваться иностранным языком в различных областях профессиональной деятельности, научной и практической работе, в общении с зарубежными партнерами, для самообразовательных и других целей.

Курс иностранного языка реализует также образовательные и воспитательные цели, способствуя расширению кругозора студентов, повышению их общей культуры и образования, а также культуры мышления и повседневного и профессионального общения, воспитанию терпимости и уважения к духовным ценностям других стран и народов.

#### 1.2 Задачи дисциплины

- коррекция произносительных навыков, расширение лексического и грамматического запаса знаний;
- совершенствование продуктивных и рецептивных умений, автоматизация навыков (устная речь, письмо, чтение, аудирование);
- формирование навыков диалогической и монологической речи, а также навыков чтения с различной степенью охвата содержания текста;
- -стимулирование самостоятельной деятельности с целью расширить собственную картину мира;
- формирование у студентов знания о стране изучаемого языка, культуре традициях, особенностях делового и социального этикета;
- -развитие способности избежать недопонимания, преодолеть коммуникативный барьер за счет использования известных речевых и метаязыковых средств.

### 1.3 Место дисциплины (модуля) в структуре образовательной программы.

Дисциплина «Иностранный язык (английский)» относится к базовой части Блока 1 «Б.1 Гуманитарный, социальный и экономический цикл. Базовая часть» учебного плана.

### 1.4 Перечень планируемых результатов обучения по дисциплине (модулю), соотнесенных с планируемыми результатами освоения образовательной программы.

Учебно-методические материалы для самостоятельной работы обучающихся из числа инвалидов и лиц с ограниченными возможностями здоровья (ОВЗ) предоставляются в формах, адаптированных к ограничениям их здоровья и восприятия информации:

Для лиц с нарушениями зрения:

- в печатной форме увеличенным шрифтом,
- в форме электронного документа,
- в форме аудиофайла.

Для лиц с нарушениями слуха:

- в печатной форме,
- в форме электронного документа.

Для лиц с нарушениями опорно-двигательного аппарата:

- в печатной форме,
- в форме электронного документа,
- в форме аудиофайла.

Данный перечень может быть конкретизирован в зависимости от контингента обучающихся.

### 3. Образовательные технологии.

Выбор образовательных технологий для достижения целей и решения задач, поставленных в рамках учебной дисциплины «Иностранный язык» обусловлен потребностью сформировать у студентов комплекс общекультурных компетенций, необходимых для осуществления межличностного взаимодействия и сотрудничества в условиях межкультурной коммуникации, а также обеспечивать требуемое качество обучения на всех его этапах.

При обучении иностранному языку используются следующие образовательные технологии:

- Технология коммуникативного обучения направлена на формирование коммуникативной компетентности студентов, которая является базовой, необходимой для адаптации к современным условиям межкультурной коммуникации.
- Проектная технология ориентирована на моделирование социального взаимодействия учащихся с целью решения задачи, которая определяется в рамках профессиональной подготовки студентов, выделяя ту или иную предметную область. Использование проектной технологии способствует реализации междисциплинарного характера компетенций, формирующихся в процессе обучения английскому языку.
- Технология обучения в сотрудничестве реализует идею взаимного обучения, осуществляя как индивидуальную, так и коллективную ответственность за решение учебных задач.
- Игровая технология позволяет развивать навыки рассмотрения ряда возможных способов решения проблем, активизируя мышление студентов и раскрывая личностный потенциал каждого учащегося.

Для лиц с ограниченными возможностями здоровья предусмотрена организация консультаций с использованием электронной почты.

### 4. Оценочные средства для текущего контроля успеваемости и промежуточной аттестации.

### 4.1 Фонд оценочных средств для проведения текущего контроля.

Текущий контроль осуществляется на лабораторно-практических занятиях, где оцениваются ответы студентов, качество выполнения домашних работ, индивидуальных заданий. Он реализуется в форме тестирования, подготовки монологического высказывания в устной или письменной формах, подготовки презентации, перевода с английского языка на русский.

Оценочные средства позволяют проводить контроль отдельных аспектов формируемой иноязычной профессиональной компетенции:

### 4.2 Фонд оценочных средств для проведения промежуточной аттестации.

Зачет предусматривает проверку качества знаний и сформированности умений в области:

- 1) иноязычных фонетических, грамматических, лексических навыков и умений для реализации иноязычной коммуникации на основе толерантного восприятия этнических, конфессиональных и культурных различий;
- 2) умений иноязычного общения в устной и письменной формах в ситуациях межличностного и межкультурного взаимодействия на изучаемом иностранном языке;
- 3) рецептивных видов речевой деятельности (чтение и аудирование), в том числе и в рамках будущей профессиональной деятельности.

### Зачет включает следующие задания:

- 1) тест на проверку соответствия уровня сформированности иноязычных грамматических, лексических навыков и умений реализации иноязычной коммуникации на основе толерантного восприятия этнических, конфессиональных и культурных различий;
- 2) монологическое высказывание в ситуациях межличностного и межкультурного взаимодействия на изучаемом иностранном языке;
- 3) тест на проверку соответствия уровня сформированности рецептивных видов речевой деятельности (чтение).

### Критерии оценки:

**- оценка «отлично»** выставляется студенту, если его ответ характеризуется умением грамотно использовать навыки перевода, адекватно подбирать лексико-грамматические единицы, а также употреблять разнообразные речевые средства. Кроме того, учитываются

и такие аспекты, как беглость и выразительность речи и смысловая связность высказывания.

- оценка «хорошо» выставляется в том случае, если студент продемонстрировал вышеуказанные навыки, но при этом допустил ряд незначительных ошибок, которые в целом не влияют на общее понимание изложенного им материала.
- оценка «удовлетворительно» выставляется, если при выполнении экзаменационных заданий студент допустил ряд серьезных ошибок при чтении, переводе и пересказе текста, а также не проявил достаточные навыки монологической речи.
- **-оценка «неудовлетворительно»** выставляется в том случае, если студент продемонстрировал полное отсутствие вышеуказанных навыков.

### Образец задания на перевод (экзаменационное задание 1) The future of computers: what can we expect?

Years ago you would have forgiven people for believing that the typewriter was the end of the line as far as that invention goes. Considering how far we've come since the typewriter was created, it's incredible to even imagine a computer beyond the ones we are used to now. Yet new technology keeps appearing, including features we would have once only expected to see or read about in science fiction. Whilst it's hard to predict what's next, the question still remains: what do we have in store?

**Cloud sharing:** The idea of a cloud network replacing hard disks as we know them is fast becoming a reality. Both Apple and Microsoft have made cloud networks key to their respective operating system – the former with iCloud and the latter, if slightly late to the game, with SkyDrive. For the moment the cloud networks in existence are used for the sake of backing up computer data, or to share the same data across multiple devices – the more they develop, the more likely it is that something as "bulky" as a hard disk will soon become obsolete.

**Smaller devices:** This is already very much a factor. Tablets have already advanced far enough to be "replacements" for desktop computers, even making laptops seem bulky in comparison. Even more than that is the new generation of smartphones, which are becoming more and more similar in scope to computers. With a variety of apps available resembling – sometimes bettering – the software we are used to, it won't be too long before we can rely on them completely. Battery life is still an issue – but again, we can only expect mobile manufacturers to find new ways to develop and improve this with time. This is a generation still very much used to having computers around, and it is unlikely we'll see them disappear anytime soon. However, it is fast becoming time to reckon with what the future holds for our computers – and technology in general.

### Образец текста для пересказа (экзаменационное задание 2) Going Paperless

In the early 1980s, F.W. Lancaster predicted a paperless society. We are not quite there yet and many not be for many years to come. There are some instances where paper is still the preferred format. Even though we have e-books, people still prefer to hold an actual paper book in their hand. There are situations, however, that going digital makes sense. Classroom and school administrative management is a perfect example. If your school has information technology infrastructure (wired and/or wireless), it is easy to implement cloud computing. And, the advantages of cloud computing far outweigh any disadvantages. From the administrative perspective:

- Staff and teacher time spent printing, filing, and distributing can be better used on more educationally-directed activities that impact student learning.
- Cost savings in terms of buying, leasing, and maintaining photocopiers and printers, ink cartridges, and paper.
- Return-on-investment by not needing to invest in purchasing, housing, and maintaining servers, software, and related IT items, such as thumb drives, and CD-ROMs.
- Greater efficiencies as teachers and staff can easily access documentation anytime, anywhere without needing to rely on someone being at their desk to sign-out a paper file.

- Streamlined workflow: Workflow can be tracked using various analytical tools to see how often files are accessed, busiest times of the day and days of the week, etc.
- Short learning curve: It does not take long a few hours (if that) to learn how to manage digital documents in the cloud.

### The Big Leap

Going from paper to digital requires a big leap of faith. We want to hold onto that paper item because we can feel, see, and touch it – something not available with a digital object. However, think of it this way. Let's say you store your documents in the cloud and back it up in paper format. Along comes a major hurricane and wipes out the paper, yet the digital items are safe and sound and easily accessible because they are stored in a secure environment. No need to worry about having to try and replicate all those paper documents – a task that would literally be impossible to accomplish.

I share these insights with you not to promulgate a 100% digital environment. Like thousands of others, I still enjoy reading hard and soft cover books. During another part of my career I was able to let go of that venerable library card catalog – but not until the technology proved to be stable and reliable. We are at the time, now, where cloud computing is stable and reliable – providing us with opportunities to implement new ways of collaboration and learning – while letting go of our educational paper archives.

### Темы для порождения монологических высказываний (экзаменационное задание 3)

Оценочные средства для инвалидов и лиц с ограниченными возможностями здоровья выбираются с учетом их индивидуальных психофизических особенностей.

- при необходимости инвалидам и лицам с ограниченными возможностями здоровья предоставляется дополнительное время для подготовки ответа на экзамене;
- при проведении процедуры оценивания результатов обучения инвалидов и лиц с ограниченными возможностями здоровья предусматривается использование технических средств, необходимых им в связи с их индивидуальными особенностями;
- при необходимости для обучающихся с ограниченными возможностями здоровья и инвалидов процедура оценивания результатов обучения по дисциплине может проводиться в несколько этапов.

Процедура оценивания результатов обучения инвалидов и лиц с ограниченными возможностями здоровья по дисциплине (модулю) предусматривает предоставление информации в формах, адаптированных к ограничениям их здоровья и восприятия информации:

Для лиц с нарушениями зрения:

- в печатной форме увеличенным шрифтом,
- в форме электронного документа.

Для лиц с нарушениями слуха:

- в печатной форме,
- в форме электронного документа.

Для лиц с нарушениями опорно-двигательного аппарата:

- в печатной форме,
- в форме электронного документа.

Данный перечень может быть конкретизирован в зависимости от контингента обучающихся.

### 7. Методические указания для обучающихся по освоению дисциплины (модуля).

Для организации эффективной работы над иностранным языком необходимо научиться следующему:

- планировать собственную учебную деятельность;
- выбирать наиболее оптимальные средства решения поставленных учебных задач;
- использовать различные виды работ со справочной и учебной литературой в процессе выполнения учебной задачи;
  - осуществлять самоконтроль в процессе учебной деятельности.

Работа над текстом

Просмотрите текст и постарайтесь понять, о чем идет речь.

При повторном чтении разделите сложносочиненные или сложноподчиненные предложения на самостоятельные и придаточные, выделите причастные обороты или другие конструкции.

Найдите подлежащее и сказуемое, и поняв их значение, переведите последовательно второстепенные члены предложения.

Если предложение длинное, определите слова и группы, которые можно временно опустить для выяснения основного содержания предложения. Не ищите в словаре сразу все незнакомые слова, попробуйте догадаться об их значении по контексту.

Внимательно присмотритесь к словам, имеющим знакомые вам корни, суффиксы, приставки. При этом обратите внимание на то, какой частью речи являются такие слова.

Слова, оставшиеся непонятными, ищите в словаре.

Работа со словарем.

Повторите английский алфавит. Это поможет находить слова не только по первой букве, но и по всем остальным.

Запомните обозначения частей речи:

n — noun - имя существительное

v – verb - глагол

adj. – adjective – имя прилагательное и т.д.

Из нескольких значений слова в словарной статье постарайтесь

подобрать близкое по смыслу, связав с общим смыслом предложения.

Помимо словарей общеупотребительной лексики пользуйтесь

терминологическими словарями по своей специальности.

Несмотря на помощь словаря, вам будут встречаться непонятные слова и выражения. Не теряйте зря времени, если очень долго не можете разобраться сами. Обратитесь за консультацией к преподавателю.

Работа над лексикой.

Запоминание лексики обычно бывает основной трудностью при изучении иностранного языка. Без знания слов не может быть знания языка. Нужно проделать большую и сознательную работу, прежде чем будет усвоен необходимый словарный минимум профессиональных терминов.

Встречая новое слово, всегда анализируйте его, обращая внимание на написание, произношение и значение. Часто можно найти сходство с аналогичным или сходным русским словом, например, passenger — пассажир и др. Важно также научиться подмечать родство новых слов с уже известными. Однако, есть слова, не поддающиеся никакому анализу. Их надо постараться запомнить, но механическое повторение не всегда эффективно. Попробуйте следующий порядок работы:

- произнесите новое слово сначала изолированно;
- произнесите словосочетание из текста с новым словом (уделите особое внимание предлогам);
- подберите к новому слову синонимы или антонимы (если это возможно);
- выполните письменно лексические упражнения после текста.

Работа над грамматикой.

Формирование речевого грамматического навыка предполагает воспроизведение различных грамматических явлений в ситуациях, типичных для профессиональной коммуникации и адекватное грамматическое оформление высказываний. Работая над этим, вам следует:

- прочтите развернутый теоретический материал по изучаемой теме в учебнике по грамматике английского языка;
- изучите справочную таблицу в приложении к данному пособию;
- найдите в тексте урока изучаемую грамматическую структуру;
- обозначьте имеющиеся грамматические ориентиры;
- сделайте письменно упражнения;
- варьируйте содержание предложений в имеющихся моделях, заменяя слова в зависимости от меняющейся ситуации;
- сопоставьте / противопоставьте изучаемую структуру ранее изученным;

Переход от навыков к умениям обеспечивается посредством активации новых грамматических структур в составе диалогических и монологических высказываний по определенной теме. Включайте освоенный материал в беседы и высказывания по пройденным темам.

В освоении дисциплины инвалидами и лицами с ограниченными возможностями здоровья большое значение имеет индивидуальная учебная работа (консультации) – дополнительное разъяснение учебного материала.

Индивидуальные консультации по предмету являются важным фактором, способствующим индивидуализации обучения и установлению воспитательного контакта между преподавателем и обучающимся инвалидом или лицом с ограниченными возможностями здоровья.

## 8. Перечень информационных технологий, используемых при осуществлении образовательного процесса по дисциплине (модулю).

### 8.1 Перечень необходимого программного обеспечения

Проверка домашних заданий и консультирование посредством электронной почты. Использование электронных презентаций при проведении практических занятий.

#### 8.2 Перечень необходимого программного обеспечения

Программы, демонстрации аудио и видео материалов (проигрыватель «Windows Media Player»).

Программы для демонстрации и создания презентаций («Microsoft Power Point»).

# 9. Материально-техническая база, необходимая для осуществления образовательного процесса по дисциплине (модулю).

#### **РЕЦЕНЗИЯ**

на рабочую программу по дисциплине «Иностранный язык» для факультета компьютерных технологий и прикладной математики по направлению: 02.03.02 «Фундаментальная информатика и информационные технологии»

Квалификация выпускника — бакалавр.

Форма обучения — очная.

Рабочая программа по дисциплине «Иностранный язык», разработанная кандидатом филологических наук Семерджиди В.Н., предназначена для преподавания студентам очной формы обучения по направлению подготовки 02.03.02 «Фундаментальная информатика и информационные технологии».

Рабочая программа составлена с учетом Федерального государственного образовательного стандарта по соответствующему направлению подготовки высшего профессионального образования (ФГОС ВО), а также с учетом рекомендованной примерной образовательной программы.

Представленная программа, рассчитанная на 360 часов (из них 182 часа лабораторных, 142 часа — самостоятельная работа и 36 экзаменационных часов) в течение 5 семестров, охватывает основные аспекты процесса обучения иностранному языку студентов неязыковых вузов в рамках освоения достаточного уровня иноязычной коммуникативной компетенции.

Написание программы обусловлено обновляющимися требованиями к учебному процессу.

Рабочая программа предусматривает изучение грамматического и лексического материала, а также развитие навыков аудирования, чтения, перевода и устной речи. Тщательно разработан график самостоятельной работы студентов, а также представлена информация о промежуточном и итоговом контроле.

Весь учебный материал содержит как общую, так и профессиональную направленность.

Программа предусматривают использование не только стандартных видов образовательных технологий, но и интерактивных форм обучения: ролевая игра, демонстрация мультимедийной презентации, электронных ресурсов, что в значительной степени обогащает содержательную сторону учебного процесса.

Раздел World Culture дает интересный фактологический материал по актуальным темам развития современного мира и способствует организации дискуссий.

В целом данная рабочая программа направлена на формирование у выпускников способности к коммуникации в устной и письменной формах на

иностранном языке для решения задач межличностного и межкультурного взаимодействия.

Рабочая программа дисциплины «Иностранный язык», разработанная Семерджиди В.Н., может быть рекомендована для использования в учебном процессе в Кубанском государственном университете.

Рабочая программа составлена с учетом Федерального государственного образовательного стандарта по соответствующему направлению подготовки высшего профессионального образования (ФГОС ВО), а также с учетом рекомендованной примерной образовательной программы, что обусловлено обновляющимися требованиями к учебному процессу.

Представленная программа, рассчитанная на 396 часов (из них 196 часа лабораторных, 164 часа — самостоятельная работа и 36 экзаменационных часов) в течение 5 семестров, охватывает основные аспекты процесса обучения иностранному языку студентов неязыковых вузов в рамках освоения достаточного уровня иноязычной коммуникативной компетенции.

Рабочая программа четко структурирована. Она состоит из тематического блока, подкрепленного рекомендациями теоретического характера, перечня рекомендованных заданий на отработку навыков различных видов речевой деятельности, сведений о самостоятельной работе студентов, а также информации о промежуточном и итоговом контроле.

Рабочая программа предусматривает изучение основных разговорных тем, необходимых как для повседневного, так и профессионального общения, расширения кругозора студентов, повышения их общей культуры и образования, а также лексический минимум и грамматические основы английского языка для использования развития навыков чтения, перевода и разговорной речи.

Тематический план содержит планируемое количество учебных часов, необходимых для овладения представленным объемом материала и полностью соответствует содержанию рабочих программ.

Для закрепления теоретических знаний и приобретения необходимых умений и навыков в рабочей программе предусмотрено выполнение практических контрольных работ по закреплению знаний по каждому разделу, а также семестровые тесты.

Достаточно подробно освящено учебно-методическое обеспечение курса. Список литературы представляет как основные, так и рекомендованные источники.

Программа предусматривают использование не только стандартных видов образовательных технологий, но и интерактивных форм обучения: ролевая игра, дискуссия по моделируемым ситуациям, демонстрация мультимедийных презентаций, использование электронных ресурсов, что в значительной степени обогащает содержательную сторону учебного процесса.

Активное использование аудиозаписей и видеоклипов способствует совершенствованию навыков аудирования, произношения, разговорной речи, закреплению грамматического материала. Все это помогает эффективно осваивать изучаемый материал, обеспечивает стимул для самостоятельной работы.

В целом данная рабочая программа направлена на формирование у выпускников способности к коммуникации в устной и письменной формах на иностранном языке для решения задач межличностного и межкультурного взаимодействия.

Рабочая программа дисциплины «Иностранный язык», разработанная Семерджиди В.Н., может быть рекомендована для использования в учебном процессе в Кубанском государственном университете.
